Nostalgia (Shown In "Midnight" Series)
All shifter models are available with black powder coated stick.

Standard

Tail Mount

All Lokar shifters have these great features: Positive lockout in park and neutral, neutral safety switch, 360° lever rotation, Teflon lined button in shifter knob for smooth quiet operation, chrome or black powder coated tapered shifter stick, Gold irradiated brackets with hardware and instructions.

Standard shifter: Shifter mounts to a main plate that attaches to the transmission case. The shifter may be positioned anywhere up and down this main plate allowing you to place it right where you want, as long as its in-line with the driveline. Shifter stick available in 6", 8", 10", 12", 16" & 23" lengths.

Nostalgia Shifter: Identical to the standard shifter (see above) except the shifter stick has two bends and is only available in 16", 23" & 32" lengths and comes with a black anodized knob.

Tail Mount Shifter: Mounts off transmission tail housing. Bracket allows two mounting locations either slightly forward or rearward of tail shaft bolts. Available in 6", 8", 10" & 12".

Floor Mount

Floor Mount Shifter: Mounts to the floorboard with unique brackets that allow the shifter to install on top of, or slightly recessed into the transmission tunnel. A couple different offset shifter arms included for linkage alignment when offset mounting shifter in relation to transmission. Stick available in 6", 8", 10", 12", 16" & 23" lengths. These are

great shifters to use in cars with consoles. **Cable Operated Shifter:** Versatile shifter location by installing directly to the floorboard and connects to the transmission with push/pull cable with durable 1/4" inner cable.
